

- Function & class
- Custom Hook (refs)
- Control vs uncontrolled
- class Lifecycle methods

(Constructor, render, componentDidMount, componentShouldUpdate, componentDidUpdate, componentWillUnmount)

React propTypes

→ SetState (callback variation with useEffect)

- useEffect (variations)
- High order Component (POC)
- Routing (Test questions revise) (match, history, location)
- context POC (revise)
- Axios (API call)
- Infinite scroll
- (useReducer, useMemo)

→ (Spread, Destructure) import

→ Redux (POC) (useSelector, useDispatch)

→ Virtual DOM → and why React is better?

- useLayoutEffect (Self)
- React render playlist (read)
- use Callback
